

iC Combination

BOILERS

i28C combination.

Trustpilot

Rated 'Excellent'

Precision engineered for unmatched reliability and efficiency

Founded in the Netherlands in 1948 with an engineering passion that still exists today, ATAG is trusted throughout the world by architects, design engineers, and homeowners alike to deliver unrivalled boiler build quality, reliability, and efficiency. From airports and commercial buildings to caring for homeowners, ATAG boilers deliver the lowest cost of ownership available today.

Key features and benefits

- ✓ **Peace of mind** with 12 years warranty as standard and the option of an industry leading 18 years (best buy with UK homeowners)
- ✓ **Built to last** and precision engineered using brass and stainless steel components for ultimate reliability
- ✓ **Maximum £ savings** on your monthly gas bills with being A-rated and the most efficient boiler range in Europe
- ✓ **Near zero loss** of % efficiency during the boiler lifetime thanks to the unique ATAG iCon stainless steel heat exchanger, which also has a lifetime warranty
- ✓ **Efficient monitoring** and control of your system with our aesthetically pleasing range of simple or wireless smart controllers
- ✓ **System cleanliness** is critical for ongoing efficiency levels so a filter, scale reducer, cleanser and inhibitor are supplied as standard with all ATAG boilers
- ✓ **Boiler plus compliant** out the box
- ✓ **Fully compatible** with the ATAG OneZone smart controller and easy to use ATAG Programmable Room Thermostat
- ✓ **Incredible hot water** performance with the largest model delivering 16.2 litres per minute

“

Purchased an ATAG combi boiler a year ago and have already found that our gas consumption has dropped considerably. ECO mode does exactly what it says. It is quiet and reliable, and we have learned to use its features easily. It has the capability to adapt to changes in gas supply rules in the future (future-proofed) and can have an external temperature sensor fitted if necessary. I would definitely recommend this to anyone looking for a new combi.

Compact dimensions

h700 x w440 x d355 or 275 (mm)
kitchen cupboard friendly

Four models available

24, 28, 36 & 40 (kw)
10.1, 11.5, 14.9 or 16.2 litres
(of hot water per minute @ 35°C rise)

Completely user friendly

with intuitive controls

Quiet in operation

due to bottom-up modulation

Instant comfort

with hot water pre-heat function

ErP “A” rated

achieves ErP ‘A’ rating for heating and hot water across all models

Responsible Choice

lowest NOx emissions available

Excellent back up service

364 days a year nationwide professional network
